

Items that Andrew Starts With

Desert Ruins

Items that appear in the Desert Ruins (Outside)

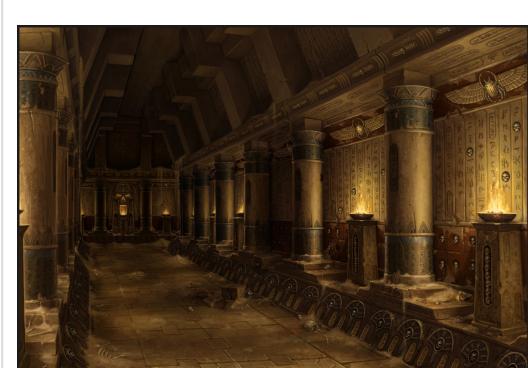

The Oasis is already purified and safe to drink so perhaps Andrew could contain some of this water in his hydro flask to be able to drink and heal. The player will be able to refill his bottle from the Oasis indefinitely.

An antique map such as this would work, but we would have to overhaul the map's design. (The way the player can access the map is through the main menu or inventory menu). Or it could be a mini-map.

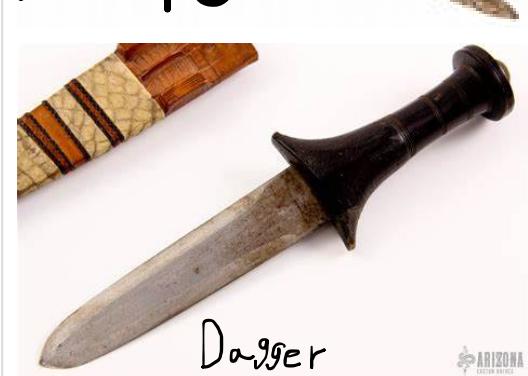

A stick that Andrew can find outside to defend himself (If he does not start out with a weapon.)

Desert Ruin Hallways

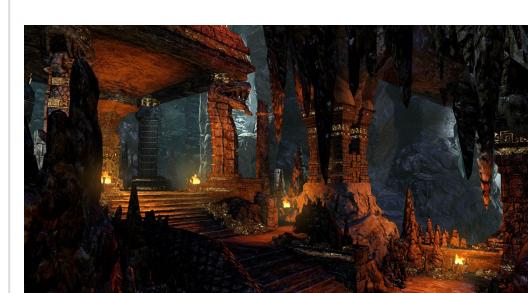

Items that appear in the Desert Ruin Hallways

Have some of the armors below be decayed and torn to signify it being unable to be picked up

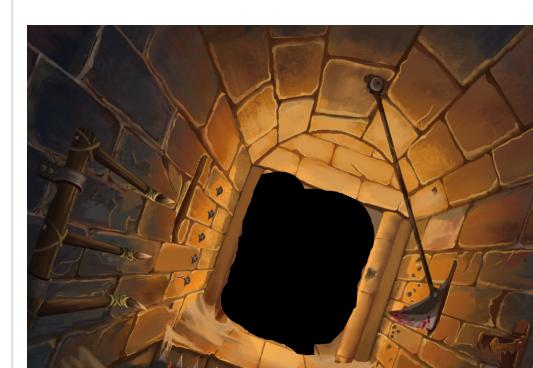

Underground Prison (Puzzle)

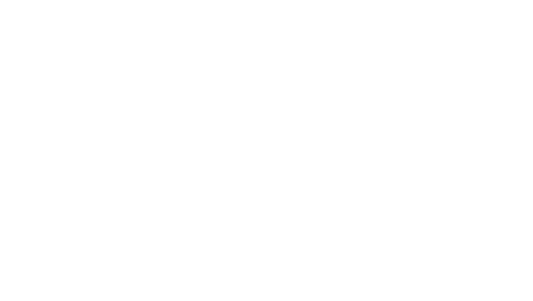

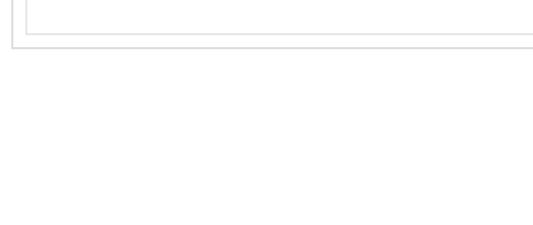

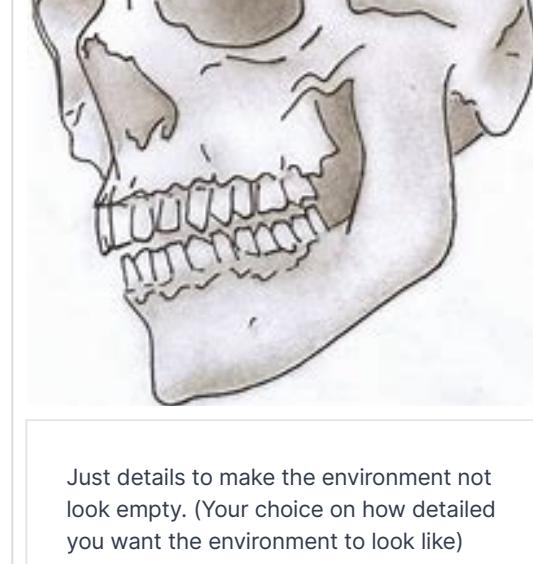

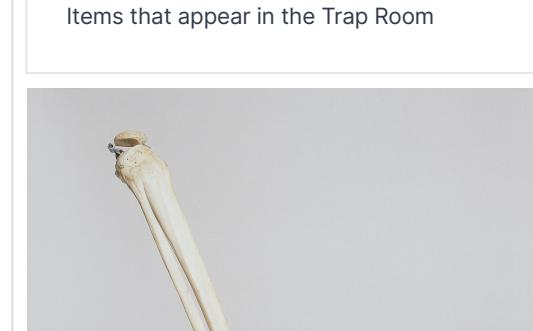

Items that appear in the Underground Prison

Trap Room

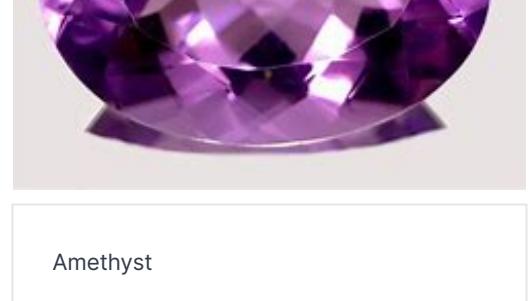

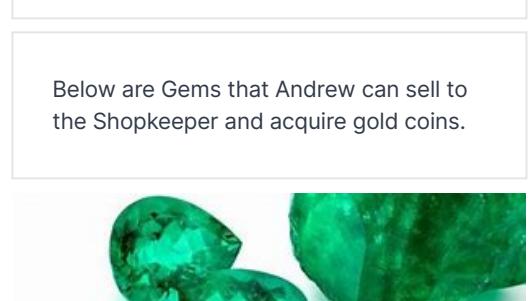

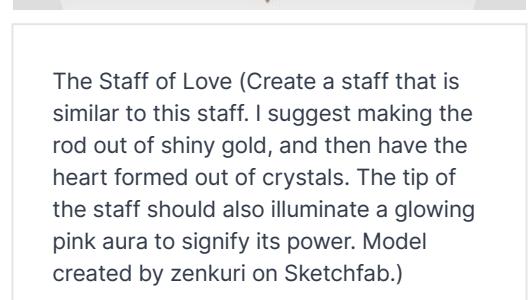

Items that appear in the Trap Room

Treasury

Items that appear in the Treasury.

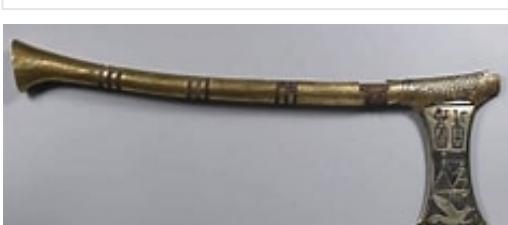

Shopkeeper Items (Placeholder Image)

Items that the shopkeeper sells to the player. (There are more items that the player can acquire from the shopkeeper but, it would not be able to fit on this list. We should make a list for the items that the Shopkeeper could sell. Perhaps RNG can determine which items appear in the shop or certain events cause certain items to appear in the shop? For example, once Andrew gets the Meteorite Dagger, the Shopkeeper will be able to sell Andrew a meteorite dagger.)

Below are weapons that the shopkeeper is able to sell to Andrew, they do more damage and are better compared to their rusty counterpart.

A Pristine Conditioned Battle Axe

A Golden and Sharp Khopesh

Below are rusty weapons that deal less damage but are cheaper than the mini-condition weapons.

A Flask Filled with Water, Andrew pours the water from this flask into his own Hydro-flask
